ERASMUS+

Field trial results so far

- Finland, Italy, Norway, Sweden, Denmark in production (Poland, Netherlands)
- Not that much exchange between Nordic countries, e.g. in Finland 50-70 students contacted
- Usage so far in field trial:

Country	HEIs	Students
Denmark	0	0
Finland	9	45
Italy	1	(5)
Norway	15	100
Sweden	8(13)	12(70)

Poland starting summer 2017, in Norway also recruitment (+1.300) and sharing of results (+5.000 people)

Supporting student mobility

Student returning home can retrieve his achievement data electronically

Identifying students

- A mobile student has two (or more) different IDs
 - Home ID, with username password
 - Host ID, with different username
- Depending on country also different student number, national social security number, etc
- Currently only matching name+birthday, or manual check
- eID to the rescue?
- How could ESC be used?

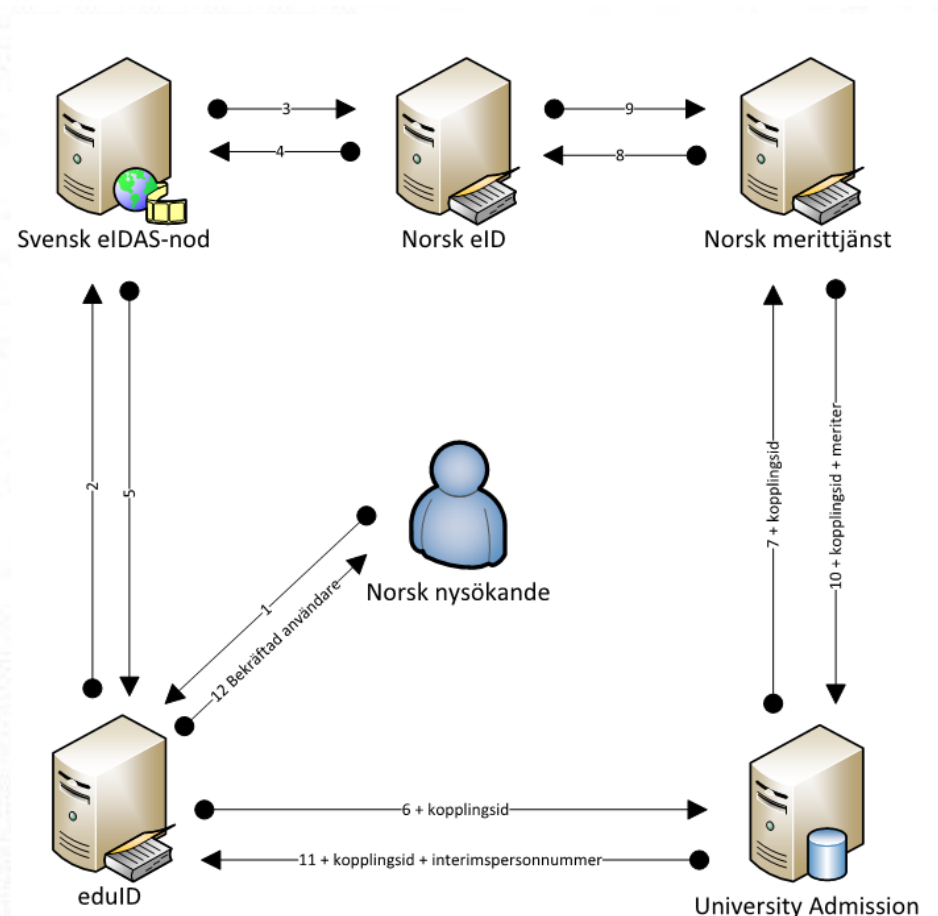

ERASMUS+

When is a student a student?

- Authentication vs authorization
- Access rights to student accounts closes fast
- Lifelong learning should mean lifelong access to ones data
- Again, eID??
- National access to records?

Practical problem: NO+SE

- CERES and Umeå University testing new ideas
- Practical issue: eIDAS node doesn't release enough info (interim social security number)
- Two-factor authentication could help, i.e. a second session to get the missing data
